Applicators, Mixers & Clamps

Wexford Manual Cartridge Applicator

An ideal, affordable application gun for the 310cc cartridges of sealant.

Incorporates a new pressure relief device to minimise sealant flow-on when trigger is released.

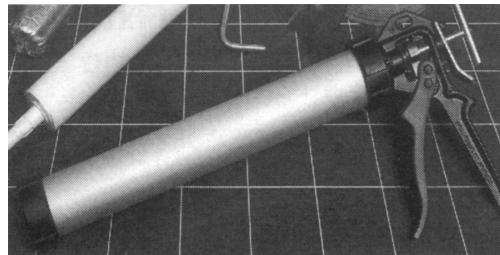

Integral rod hook provides convenience during use and is an effective method of storage.

Multi-Purpose Manual Gun for Professional Users

600ml CX/HBG/600
400ml CX/HBG/400

All parts resistant to most cleaning solvents.

Please call our sales department for availability of accessory parts for this product.

Multi-purpose Manual Gun for Professional Users

Engineered to meet the demanding ends of constant daily use by professional tradesmen.

Available in different formats to dispense either cartridges, sachet or bulk packed sealant.

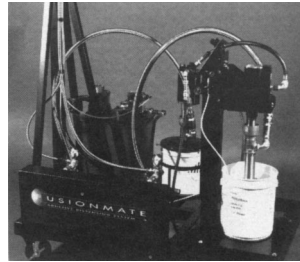

Plunger and nozzle configurations can be altered to provide optimum efficiency for an application task.

Die-cast in lightweight aluminium with specifically designed plungers which are able to provide a clean sweep of bulk supplied sealant, whilst eliminating possible pinching of sachet packets.

400cc barrel length option for 'mini-bulk'.

Bulk application tools available on request. See also tools and accessories

Mk 5 Pneumatic Applicator

600ml CX/AP/600
310ml CX/AP/310

Available in different barrel sizes, please call our sales department for details.

Mk 5 Pneumatic Applicator

Incorporating an ergonomically designed lightweight plastic handle for comfortable handling. Pressure regulator secured below trigger for ease of access.

Complete with silencer fitted to quick exhaust valve for quieter operation.

Connector for air hose rotates and swivels for maximum freedom of movement.

Solo Clamps

100mm CX/Solo/100
150mm CX/Solo/150

Available in 100mm (4") and 150mm (6") sizes

Solo Clamps

Ideal for use with only one hand. Suitable for clamping objects to be glued, fixed, drilled, etc. Ideal for clamping workpieces in the factory, on site or at home. Very fast, easy to use and exceptionally strong. Top jaw can be angled to follow the plane of the workpiece surface. Release of clamping force is also one handed and instantaneous.

Applicators

ITW Plexus 10:1 Manual Dispensing Gun
380ml CX/CCM380

ITW Plexus 1:1 Manual Dispensing Gun
400ml CX/VBM280

ITW Plexus

10:1 Manual Dispensing Gun

Designed to be used with all of the Plexus 10:1 ratio products. Handy for small jobs where air access is not feasible or where an air gun is not cost effective.

1:1 Manual Dispensing Gun

Designed to be used with all of the Plexus 1:1 ratio products. Handy for small jobs where air access is not feasible or where an air gun is not cost effective.

ITW Plexus 10:1 Air Operated Dispensing Gun

380ml CX/CCA380A

10:1 Air Operated Dispensing Gun

Designed to be used with all of the Plexus 10:1 ratio products. This product pays for itself when used on any medium to large project, as the pressure can be adjusted depending on how much flow is required.

ITW Plexus 1:1 Air Operated Dispensing Gun

400ml PLX/1:1

1:1 Air Operated Dispensing Gun

Designed to be used with all of the Plexus 1:1 ratio products. This product pays for itself when used on any medium to large project, as the pressure can be adjusted depending on how much flow is required.
