absorbent. Each cloth folded to sixteen layers.

Gramos

TAKrags are specially formulated wiper cloths designed to achieve totally dust and residue free surfaces prior to painting and finishing.

Traditionally used in the paint thinning industries, TAKrags are also invaluable for dust removal in assembly environments involving electronics, computers and any other operations, where dust in an assembly can prevent effective operation.

Gramos Traditional boxes of cotton rag

12.5 kilos COTTONRAG

Traditional Cotton Rag

Available in boxes containing 12.5 kilos these old cotton cloths are cut into various sizes ready for use. Although every effort is made to ensure a pure white rag content only, sometimes a small amount of coloured rag may slip through.
