Wexford Manual Cartridge Applicator

Cartridge applicator   CX/250-SG

This product represents excellent value, please call for latest price.

Wexford Manual Cartridge Applicator

An ideal, affordable application gun for 310cc cartridges of sealant. Incorporates a new pressure relief device to minimise sealant flow-on when trigger is released. Integral rod hook provides convenience during use and is an effective method of storage.

Mk5 Pneumatic Applicator

Cartridge applicator   CX/APG/600

Available in different barrel sizes, please call our sales department for details.

Mk 5 Pneumatic Applicator

Incorporating an ergonomically designed lightweight plastic handle for comfortable operation. Pressure regulator secured below trigger for ease of access. Complete with silencer fitted to the exhaust valve for quiet operation. Connector for air hose rotates and swivels for maximum freedom of movement.

Bulk Manual Gun for Professional Users

Manual Gun   CX/HBG600
Mini Bulk   CX/HBG400

400cc barrel length option for 'mini bulk'.

All parts resistant to most cleaning solvents.

Please call our sales department for availability of accessory parts for this product.

Bulk Manual Gun for Professional Users

Engineered to meet the demanding ends of constant daily use by professional tradesmen. Available in different formats to dispense either cartridge, sachet or bulk packed sealant. Plunger and nozzle configurations can be altered to provide optimum efficiency for an application task. Die-cast in lightweight aluminium with specifically designed plungers which are able to provide a clean sweep of bulk applied sealant, whilst eliminating possible pinching of sachet packets.

Solo Clamps

Solo 100mm   CX/100-P
Solo 150mm   CX/150-P

Available in 100mm (4") and 150mm (6") sizes.

Solo Clamps

Ideal for use with only one hand. Suitable for clamping objects to be glued, fixed, drilled etc. Ideal for clamping workpieces in the factory, on site or at home. Very fast, easy to use and exceptionally strong. Top jaw can be angled to follow plane of workpiece surface. Release of clamping force is also one-handed and instantaneous.

B1 Mixer Range

1:1 mix   WS/PS/300-X
10:1 mix   CX/S/300-X

Mixing nozzles available ex stock.

B1 Mixer Range

Combined with a motionless mixing nozzle. Allows fast application of two part cartridge based products. Specially designed applicator frame provides secure location of the cartridge. Available for use with Plexus and Proset Twin cartridge dispensing systems.
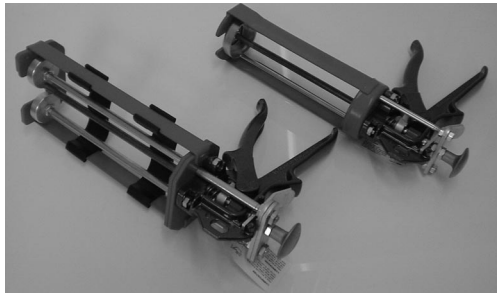

Sealey

150mm Heavy Duty Random Orbital Sander

Sealey 150mm Heavy Duty Random Orbital Sander
150mm 5/16"UNF 450 Watts 8000 rpm
8mm 2.6 Kilos SY/ER150

Vertical type orbital sander for heavy duty sanding applications. Tough composite body shell with trigger type operation and power lock control. Supplied with side handle and pad.

Heavy Duty Sander/polisher 6 Speed that features a 6 speed power control, producing speeds suitable for sanding and polishing. The heavy duty motor has produced up to 220 watts of power under our load tests. With an alloy bevel gear head with composite motor housing and trigger type operation with power lock control, this sander is supplied with a side handle and 180mm backing pad.

Sealey Heavy Duty Random Sander/polisher 6 Speed
180mm M14 780-1300 Watts
6 speed 1170-3000 rpm 4.4 Kilos
SY/MS/700PS

Plexus
Dispensing Guns

Plexus 10:1 Air Operated Dispensing Gun
10:1 Air gun CX/CCM380A/10

10:1 Air operated dispensing gun
Designed to be used with all of the Plexus 10:1 ratio products. This product pays for itself when used on any medium to large project, as the pressure can be adjusted, depending on how much flow is required.

Plexus 1:1 Air Operated Dispensing Gun
1:1 Air gun PLX/1:1/AIR

1:1 Air operated dispensing gun
Designed to be used with all of the Plexus 1:1 ratio products. This product pays for itself when used on any medium to large project, as the pressure can be adjusted, depending on how much flow is required.

Plexus 10:1 Air Operated Dispensing Gun
10:1 Air gun CX/CCM380X/10

Plexus 1:1 Air Operated Dispensing Gun
1:1 Air gun CX/VBM200X

10:1 & 1:1 Manual dispensing guns
Designed to be used with all of the Plexus 10:1 and 1:1 ratio products. Handy for small jobs where air access is not feasible or where an air gun is not cost effective.

Fein

Fein Multimaster

Multimaster   FN/MULTIMAST

The Fein Multimaster makes the work of professional boatbuilders much easier. For example, sanding round corners and edges, even the most difficult grooves, in folds, roughing down fibreglass surfaces prior to lamination. Narrow sections present no problem when tackled with the appropriate accessories.

Multimaster

The Fein Multimaster uses the principle of oscillating movement, thus offering top performance and a huge range of applications. It oscillates back and forth at a rate of up to 21,000 per minute around an angle of 3.2 degrees. The functional characteristic offers unique advantages such as; Recoil free operation when sanding corners and edges, High abrasive performance right into the the furthest corners, Low running noise and vibration-free operation, Particularly high standard of working safety during sawing. This single machine is ideal for professional results when sawing, sanding, scraping, separating, rasping, polishing, cutting and consolidating concrete - a professional triangular sander.

Fein Cutter

3mm blade width	1 unit	FN/63903200017
4mm blade width	1 unit	FN/63903201016
5mm blade width	1 unit	FN/63903202019

Cutter

The Fein cutter's oscillating movement works with amazing efficiency. Insulating glass windows can be dismantled quickly and effortlessly. Metal fastening strips in walls can be cut through precisely with a minimum of dust, and almost no damage to the wall. The Fein Cutter is also ideal for removing putty from single pane and countersash windows. the saw can be inserted at any point in the material, the cuts are precise and laminated sections do not become frayed. The depth stop ring is an essential feature which can be used precisely to determine the depth.

The cutting blades cut away polyurethane or marine glue rapidly and without effort and are also ideal for difficult areas such as; cabin superstructures, bollards, gunwales or traverse joints. Practical tests have demonstrated that when it comes to renovating the wooden deck of a ten metre boat, the working time can be reduced by 80 hours in comparison to ordinary methods, by using the Fein Cutter.

Please note that we offer the full range of tools from Fein, Sealey and Indasa. If you require catalogues from these manufacturers, please contact us.

Linbide

Linbide Tungsten Carbide Tipped Scraper
Scraper   IND/R-GP
Spare blades 5 pack   IND/R-GPS

Tungsten Carbide Tipped Scrapers
This convenient double edged dual use scraper/scriber makes the cutting of laminates quick and easy, using the scribe and snap method. With its 50mm wide cutting blade it's ideal for the quick and easy removal of paint and varnish.

Linbide Tungsten Carbide Tipped 90⁰ Scraper
Scraper   IND/R-GP14
Spare blades 5 pack   IND/R-GP14S

Tungsten Carbide Tipped 90⁰ Scraper
The scraper is designed for those 'hard to get to' 900 corners, is easy to use and very effective. The cutting blade is 14mm in length down both cutting faces and is ideal for the removal of paint and putty.

Linbide Gelcoat Planer Blades
Blades   6mm x 82mm x 10   IND/RN19A

Other blades may be available on request.

Gelcoat Planer Blades
Double edged tungsten blades for use with Gelcoat Planer.

Permagrit Tools Tungsten Carbide Abrasives
Use on;
Woods, plastics, perspex, plexiglass, carbon fibre, fibreglass, kevlar, brick, stone, foam, ceramics, glass, aluminium, etc.

Permagrit Tools

Tungsten Carbide Abrasives
These tungsten carbide products really do cut much cleaner and quicker than the diamond equivalent.

- Tungsten carbide tools will last for years.
- One of the hardest materials next to diamond.
- Cut, sand and shape quicker for faster construction.
- Will not lose their edge like conventional files.
- Tools can be cleaned with any solvent.
- Used by the world's top builders.

We are the sole marine distributors for Permagrit Tools. If you require more information on the Permagrit range, please contact one of our sales team.

REMEMBER:- Always wear protective goggles when using cutting discs or rotary tools
